Summary

Motivated and enthusiastic Computer Science Engineering student currently pursuing B.Tech after completing a Diploma in Computer Science Engineering. Possessing knowledge of HTML, CSS, SQL, PHP, React Native and Java along with hands-on experience in academic projects and industrial training. A quick learner with strong analytical and problem-solving skills, eager to apply technical knowledge, gain practical experience, and contribute effectively to organizational growth.

Internship / Training

Industrial Training – Impian Global Media Pvt. Ltd.

Duration: 1 Month

- Completed industrial training focused on mobile application development using React Native.
- Learned fundamentals of cross-platform mobile app development and component-based architecture.
- Developed basic mobile application interfaces and gained hands-on experience with React Native concepts.
- Strengthened teamwork, communication, and problem-solving skills through practical assignments.

AICTE Virtual Internship (Data Science & Machine Learning) – UpSkill Campus

Duration: 1 Month

- Currently pursuing an AICTE-approved virtual internship in Data Science and Machine Learning through UpSkill Campus.
- Gaining hands-on exposure to Python programming, data preprocessing, and machine learning fundamentals.
- Working on practical assignments involving data analysis, model building, and problem-solving techniques.
- Learning concepts such as data visualization, feature engineering, and basic machine learning algorithms.
- Enhancing analytical thinking, teamwork, and project development skills through industry-oriented training sessions.

Skills

Tools/Technologies: HTML, CSS, SQL, PHP, React Native, Java

Projects

Travelling App (React Native)

- Developed a prototype mobile application for travel planning and destination exploration using React Native.

- Designed user interface screens for browsing destinations and trip-related information.
- Implemented basic navigation and responsive mobile UI components.
- Gained hands-on experience in React Native, component-based development, and mobile application architecture.
- Project remained under development due to academic priorities and is currently in the prototype stage.

Technologies Used: React Native, JavaScript

Fake News Detection System - Ongoing

- Developing a machine learning-based system to classify news articles as real or fake.
- Performing data preprocessing, text cleaning, and feature extraction using Python libraries.
- Training and evaluating machine learning models for accurate prediction.
- Integrating news APIs for fetching real-time news data and displaying prediction confidence.

Technologies Used: Python, Pandas, NumPy, Scikit-learn, NLTK, APIs

Smart City Traffic Forecasting System - Ongoing

- Developing a predictive analytics system to forecast traffic conditions using historical datasets.
- Performing data analysis, visualization, and preprocessing for model development.
- Applying machine learning techniques to identify traffic patterns and improve prediction accuracy.
- Gaining practical experience in data handling and model implementation.

Technologies Used: Python, Pandas, NumPy, Matplotlib, Scikit-learn

Education

Dr. A.P.J Abdul Kalam Government institute of Technology, B.tech(CSE)	Aug 2024 - Present
G.P Kashipur, Diploma in CSE (GPA: 8)	Aug 2021 - June 2024
Lions Public School ,12th	April 2020 - March 2021
Lions Public School,10th	April 2018 - March 2019
